

Acme Customer Success Handbook

Customer Success Playbook — Edition 2024

1. Onboarding Process

All new customers follow a structured 30-60-90 day onboarding plan. The kickoff call occurs within 5 business days of contract signature. Technical setup is completed within 30 days. First value milestone is targeted within 60 days.

2. Health Scoring

Customer health is scored from 1 (critical) to 100 (excellent) based on product usage, support ticket volume, NPS, and executive engagement. Health scores are reviewed weekly by the CSM team and monthly by leadership.

3. Escalation Paths

At-risk customers (health score below 60) are escalated to the Customer Success Manager within 24 hours. Customers below 40 are escalated to the Director of Customer Success. Customers below 25 require a formal save plan reviewed by the VP.

4. Quarterly Business Reviews

Quarterly Business Reviews (QBRs) are mandatory for all customers above \$50,000 in annual contract value. The QBR deck must include adoption metrics, realized value, and a forward-looking roadmap aligned to the customer's business goals.

5. Renewal Management

Renewal conversations begin 120 days before contract end. Contracts above \$100,000 require an executive sponsor meeting. Churn risk above 30 percent triggers a formal save plan.

6. Expansion

Expansion opportunities are identified when a customer reaches 80 percent of licensed seats, exceeds usage thresholds, or requests capabilities outside their current tier. Expansion targets are set at 115 percent net revenue retention.
